**Station 7 Update:** Progress is being made on the project. The future basement has been dug. Shoring is currently being conducted. There is a large stockpile of dirt on site for the backfill. Basement has been formed and waterproofing has been installed. The pad for the back building has been constructed. Winterization is down for future rains. Director Miller asked about the grading moratorium the Town has. Director Miller inquired where the project is currently so that doesn’t become an issue. Mr. Wassermann advised the moratorium begins on October 15th. The builder has already asked for a 30-day extension to November 15th and will probably be requesting one more extension with hopes it is completed by December 1st. Director Miller asked a follow-up if it is not completed, does work stop? Mr. Wassermann advised the area not completed may need to be
tarped and work would continue around those areas. Mr. Wassermann advised the Board of ongoing PG&E issues, but stated the Town played a big role in assisting with infrastructure issues. He also advised of extended lead times for obtaining transformers through PG&E. Current lead times are up to 50 weeks. Attempts are being made to expedite those lead times. August 17th, 2023 is the current projected completed date, not including the transformer.

PG&E is of concern, as there is work on drawings for PG&E approval. During excavation it was realized the gas line needed to be relocated, as well as electric lines. There will be more to follow on expediting approval of the drawings/engineering. Completion date is projected October 24th, 2023. There was a group discussion confirming PG&E delays are not isolated to the WFPD projects but are widespread with long lead times on various items. There were no further questions from Board members.
