

Plant Separation, both horizontally and vertically, within 100 feet or to the property line, can help protect your home by reducing the fire's ability to spread.

Trees and shrubs that give us privacy, safety from wind, and lessen the noise level around your home also can lead wildfire to your doorstep.

Woodside Fire Protection District

SHRUB SEPARATION

Plants that are more than 2 feet in height should be in groups of no more than 3, and need to be separated by 3 times the height of the tallest plant, or 15 feet, which ever is greater.

TREE SEPARATION

Trees should be in groups of no more than 3 and at least 30 feet apart.

VERTICAL SEPARATION

- Trees and shrubs more than 10 feet in height need to be set apart by at least 4 feet between the lowest hanging branch and plant tops on the ground

- All shrubs below trees need to be 2 feet high or less
